

HPW-Q-MXX

Mini Qube

SECURE

LOGIQ

The Secure Logiq M-Series Qube range has been designed to provide a standalone all-in-one server and client solution for the small to medium sized IP CCTV installation. With a compact form factor, 300 Mbps throughput and up to 8TB of on-board storage the HPW-Q-M range are quality products for the budget conscious installation offering serious competition to the appliance or NVR market.
