

ME-10 metal enclosure is intended to protect proximity readers from the atmospheric conditions and mechanical risks. It is possible to install these readers which are compatible with MCT12 and MCT84 terminal enclosures. ME-10 enclosure is made of

stainless metal and painted with powder coating. Factory new enclosure is equipped with a tamper contact which allows detection of enclosure disassembly or detachment from the place of installation.

*The reader shown in the photos is not included in the ME-10*
