STid Electronic Identification — Online platform

User card download — Secure IDENTIFICATION

Configuration card download — Secure CONFIGURATION

User card download — Secure IDENTIFICATION

▶ User card management

- [+] Centralized platform to create, revoke and update virtual cards remotely
- [+] Unlimited reallocation of private ID from revoked cards
- [+] Simplified management of occasional visitors and VIPs
- [+] Option to update the free STid Mobile ID CSN card into STid Mobile ID+ card
- [+] Customization of user cards: variable data (surname, first name, function, etc.), ID photo, card background, logo, barcode, etc.

▶ Intuitive, user-friendly and customizable interface

The Web portal provides a step-by-step guide and centralizes your data on a single platform with just a few clicks of the mouse.

- [+] Import of your existing user databases
- [+] Customizable user interface

Log in now to the Online platform

▶ Welcome to high security

First manufacturer to receive First Level Security Certification (CSPN), STid has developed the STid Mobile ID® Online secure platform that complies with the French CNIL requirements and General Data Protection Regulation no. 2016/679.

- [+] Secure HTTPS web portal and encrypted data
- [+] Protection of data exchange between the platform and smartphones
- [+] Encryption of account and sub-account databases

▶ Keep control of your security

Our Online platform enables organizations to remain autonomous and independent with access virtual card and reader configuration management.

- [+] Multi-account / Multi-level / Multi-client: each client creates an unlimited number of sub-accounts (resellers, end customers) from its own account
- [+] Data stored on a secure platform with the highest certification levels: PCI DSS v3.2, Open IX Datacenter OX-2 for MRS01, ISO 27001, compliant with the SecNumCloud (ANSSI secure cloud regulations) and General Data Protection Regulation no. 2016/679
- [+] Management of fully customized levels of rights - administrators, operators - allowing multiple users to work simultaneously on your platform.

SECURE AND DYNAMIC VIRTUAL CARD MANAGEMENT

STid
Electronic Identification

▶ Our Online architectures

STid is the only manufacturer that gives you the choice between hosting data on STid server, or within your own infrastructure.

STid
Electronic Identification

Management via STid portal

YOUR PORTAL

Management via Client portal
