

# **SP500**

## **INDOOR SOUND ALARM**

### **Description**

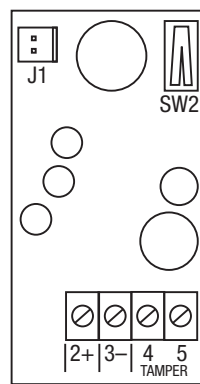

SP500 is a high-performance and low-consumption acoustic device to signaling of alarm.

### **Wiring**

Connect the positive 12 Vdc output from the control panel, minimum power 100 mA, on terminal 2 (+), and the negative to terminal 3 (-) as shown in Pict. 1

<b>2 +</b>	+ 12 Vdc positive power input
<b>3 -</b>	GND negative power supply
<b>4, 5 TAMPER</b>	Tamper N.C.
<b>J1</b>	Piezoelectric connector
<b>SW2</b>	Tamper button

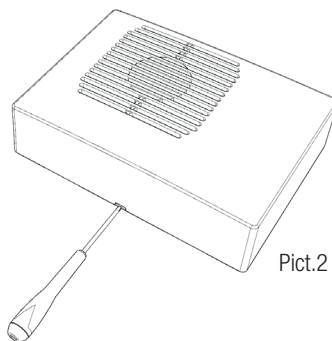

Pict.1

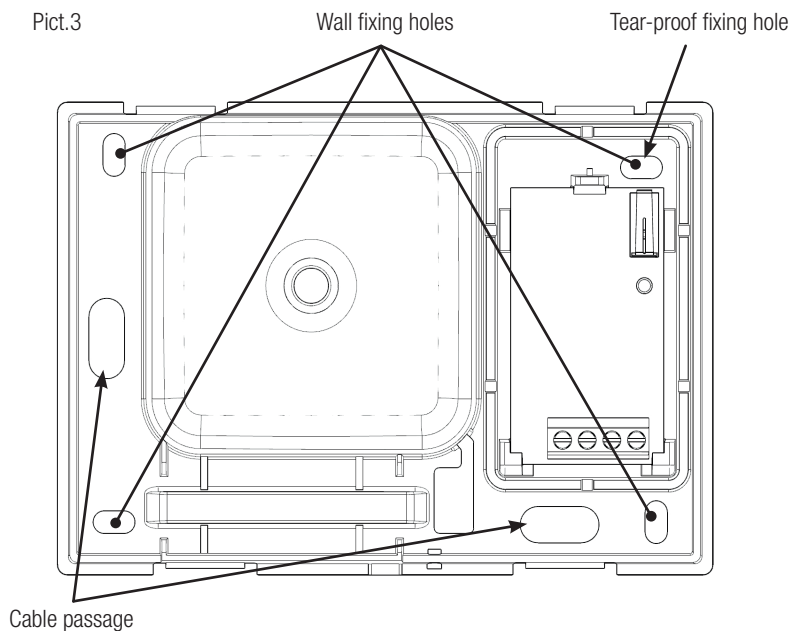

### **Installation**

The sounder must be installed by qualified staff only, respecting all installation norms as well as proper distances and height to get the best acoustic performances.

1. To open the sounder, insert a 5 mm screwdriver in the hole located on the base of the sounder and then rotate it clockwise or counterclockwise in order to fast or unfasten the cover. Pict. 2.
2. Fix the SP500 to the wall using the slots provided on the bottom of the siren using 5 mm plugs.
3. To have tamper to protect mounting and lid make sure that the siren is fixed using the hole indicated in pict. 3.
4. For the passage of the cables it is possible to use the holes indicated in pict. 3.
5. Use an adapter to connect all cables in case of a system with external pipes.

**CARATTERISTICHE TECNICHE**

Rated power supply voltage (Vn)	12 Vdc (from 10 Vdc to 15 Vdc)
Consumption at 12 Vdc	70 mA $\pm$ 10 mA
Sound power	101 dB @ 1m
Working temperature	-10 °C + 40 °C
Humidity	75% Max
Protection degree	IP4X
Security	Degree 3
Environmental class	II
Size	135x100x35 (HxWxP) mm
Weight	153 gr

**WARRANTY**

All Venitem products are granted against factory or material defects. In order to improve design and quality of the products, Venitem reserves the right to modify them without prior notice. All faulty or defective items must be returned to the supplier.
