(1in/1out)

Mic

H.265 Encoding

The H.265 video compression standard offers double the data compression ration at the same level bit rate, it can save the storage cost and offer better image for the customers.

H.264

H.265

15m IR Distance

3 IR lights can support 15m IR distance, the image is clear even in the dark environment.

Wi-Fi / PoE

Reduce wiring troubles

2.4G/5G dual-band Wi-Fi

5GHz: Less Wi-Fi interference, faster at short distance transmission

2.4GHz: Stronger capability of penetrating walls, more stable for remote transmission

PoE function:

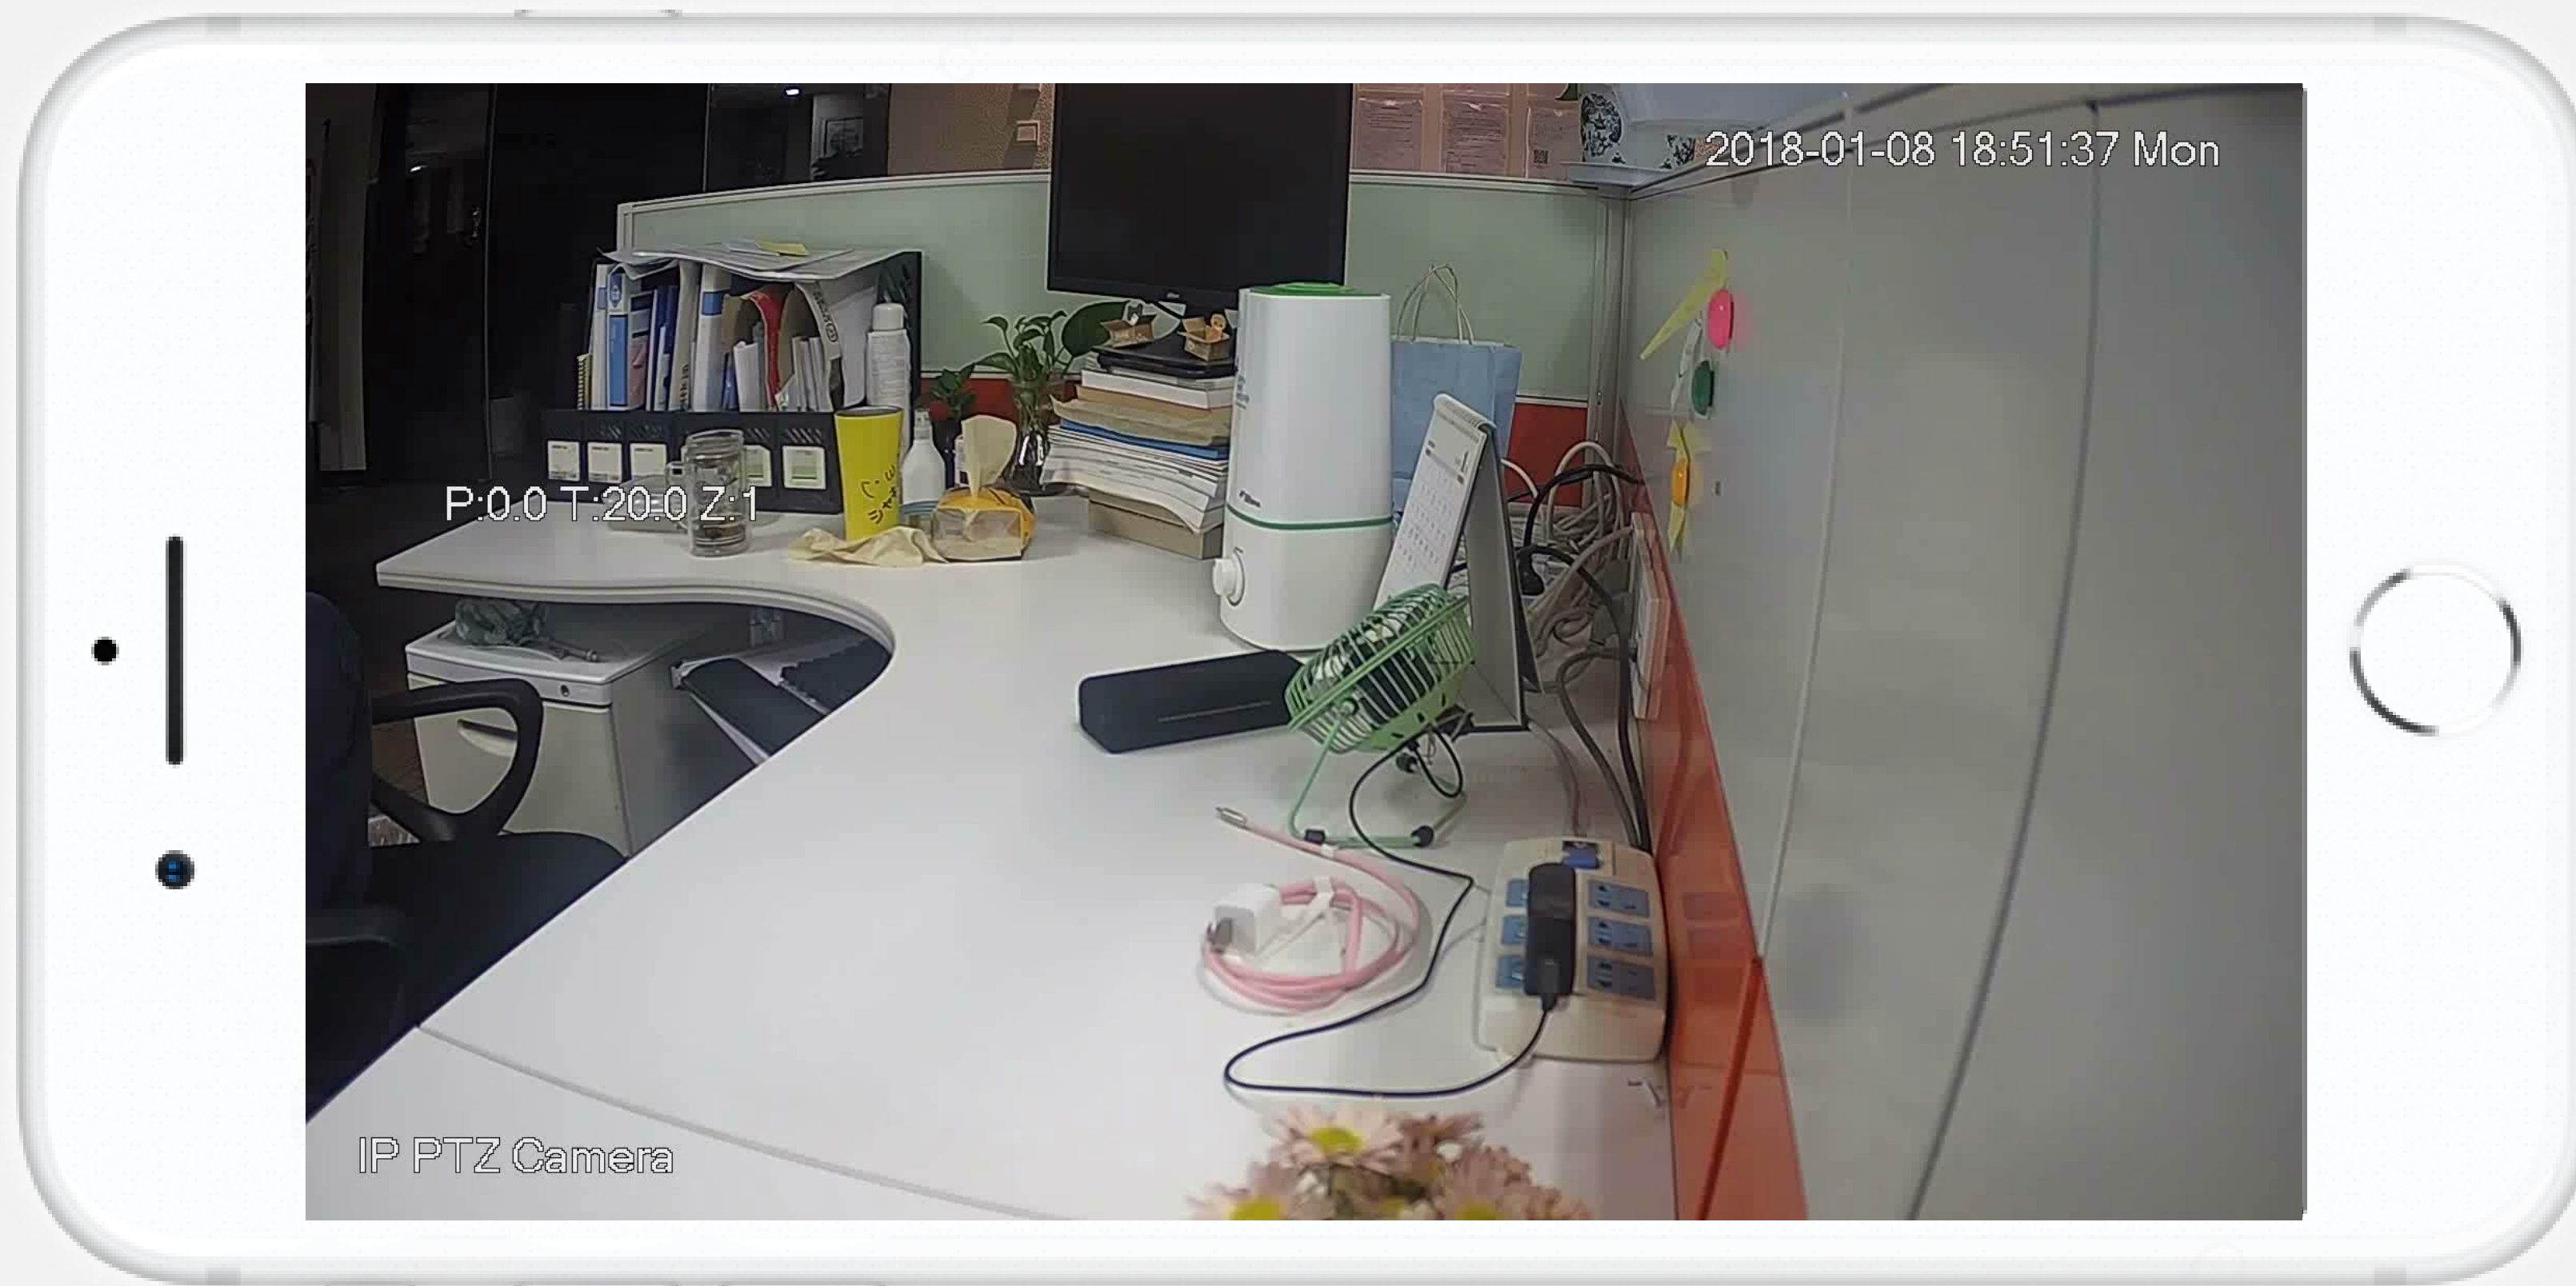

The PoE function can be used for some scenes, which is difficult to deploy the power supply.

Pan:355° /Tilt: 85° Rotation

The camera supports 355° pan rotation, and 85° (PT models: 70°) tilt rotation. That helps the customer easy to control the camera to the scene where he want to monitor.

Video

120dB WDR

WDR OFF

WDR ON

WDR can adjust the video brightness when the contrast between the strong light region and dark light region is too high, especially useful for the monitoring outside with intense backlight.

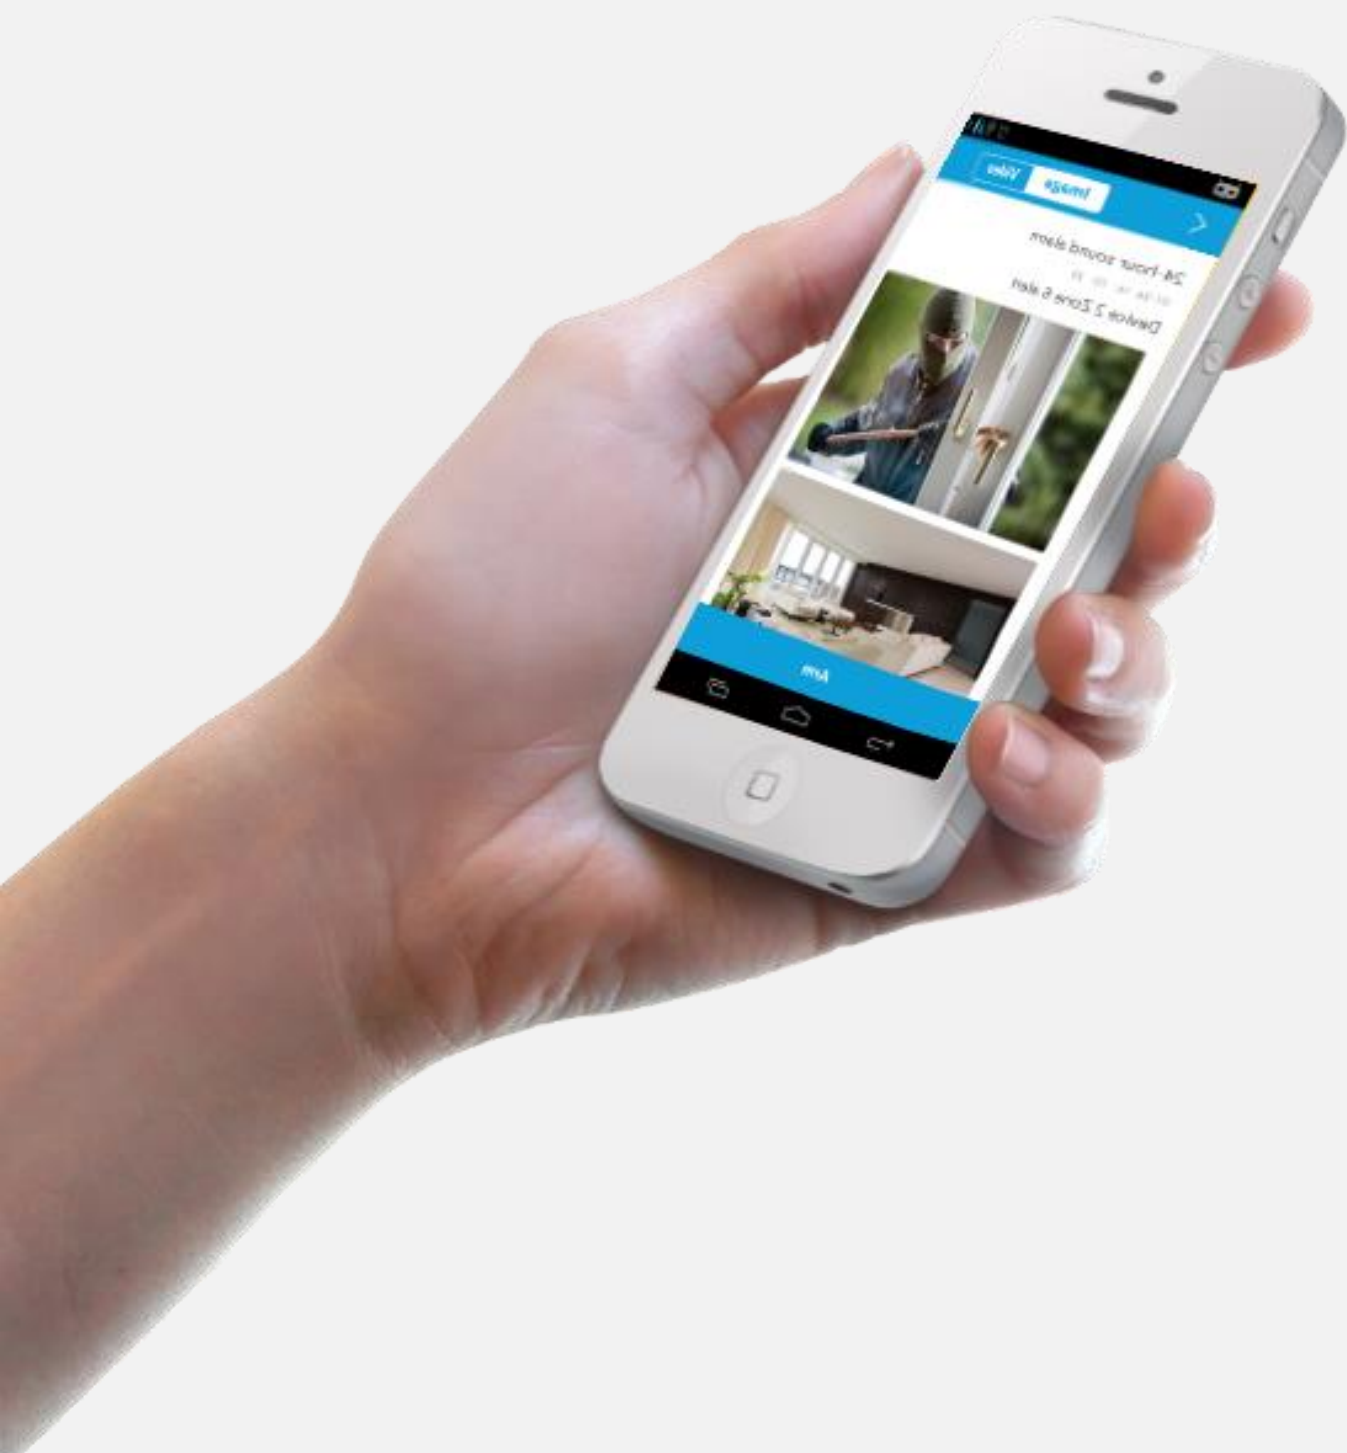

IVS / Face Detection

IVS and Face Detection ensure efficient surveillance and protect the property from loss.

Remote Monitoring

Featured with Easy4IP function, customer can monitor remotely by phone anytime and any where

Easy installation

Standard with a changeover plate, which helps the installation easily.
