-------------	----

UV-stabilised polycarbonate Call Point covers protect a wide range of call points and electrical switches, without restricting legitimate operation. Ideal for shopping centres, hotels, schools, colleges, hospitals, nursing homes and all public buildings where there is a risk of accidental activation. All covers are available in a variety of colours for various applications.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

For colour & model variations visit www.sti-emea.com

Refer to Page 13 for dimensions.

FIRE & SAFETY

Call Point Protectors

DESIGN

Protective cover with optional integral sounder, prevents false fire alarms, without hindering legitimate operation of a manual call point in the event of an emergency. Euro Stopper Multi Kit supplied with Red and Green Housing Shell and multi-lingual language label for self-assembly.

INSTALLATION

Quick and easy to install and protecting in minutes. A simple 4 fixing installation can retrofit over existing device. Can accommodate flush or surface mount applications.

ELECTRONICS

Available with or without a 96 dB integral sounder, powered by a 3V lithium battery. The sounder draws immediate attention to the area.

CONSTRUCTION

Tough, clear UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage to the manual call point or emergency button.

1. Euro Stopper® Multi Kit

Protective cover prevents false fire alarms. Supplied in kit form, with glow in the dark frame.

STI-15010ML - Flush

STI-15020ML - Flush/Sounder

STI-15C10ML - Surface

STI-15C20ML - Surface/Sounder

4. Stopper II®

Larger cover prevents malicious or accidental damage to call points and electrical switches.

STI-1100 - Flush/Sounder

STI-1130 - Surface/Sounder

STI-1200 - Flush

STI-1230 - Surface

3

5

4

2. Universal Stopper®

Protective cover protects manual call points and electrical switches without hindering operation.

STI-13010FR - Flush

STI-13020FR - Flush/Sounder

STI-13110FR - Surface

STI-13120FR - Surface/Sounder

5. Weather Stopper II®

Larger weatherproof cover protects MCP's and larger devices against the ingress of dust or water.

STI-1250 - Flush

STI-3150 - Surface

3. Call Point Stopper®

UV-stabilised polycarbonate cover protects a wide range of electrical switches and call points.

STI-6930 - Flush

STI-6931 - Surface

6. Enviro Stopper®

IP rated protective cover ideal for extending life and reliability of devices in harsh environments.

STI-13610FR - Sealed Back Box

STI-13620FR - Sealed Back Box/Sounder

STI-13710FR - Open Back Box

STI-13720FR - Open Back Box/Sounder

The Universal Stopper and IP Rated Enviro Stopper are protective covers which help prevent malicious or accidental activations to vulnerable call points or switches. They are designed to protect devices such as call points and emergency buttons from the elements and ingress, making them ideal for indoor/outdoor use. Both models are ideal for schools, hospitals and all public buildings where there is a history or threat of false activation.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 13 for dimensions.

FIRE & SAFETY

Universal Stopper® & Enviro Stopper®

DESIGN

Protective covers with or without integral sounder. Prevents false alarms without hindering legitimate operation of a manual call point or emergency button. The Universal Stopper is retrofittable, and the Enviro Stopper is an IP Rated enclosure.

INSTALLATION

Quick and easy to install and protecting in minutes. A simple 4 fixing installation can retrofit over existing device. Can accommodate flush or surface mount applications.

ELECTRONICS

Available with or without a 96 dB integral sounder, powered by a 9V PP3 battery. The sounder draws immediate attention to the area. Optional 12-24 VDC powered units available.

CONSTRUCTION

Tough, clear UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage.

- CW = White
- NW = White
- CY = Yellow
- NY = Yellow
- CE = Orange
- NE = Orange
- * NC is only available with Hood Option '00'

*For custom label option, must provide wording (max. 2 lines, 20 characters per line, including spaces).

The Exit Stopper is a unique and highly effective way to alert you to any unauthorised exits or entries through emergency exit doors. If the protected door is opened, the electronic Exit Stopper emits a powerful 95/105 dB warning alarm. Available in red or green.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 13 for dimensions.

FIRE & SAFETY

Door Alarms

DESIGN

Unique and highly effective way to alert you to any unauthorised exits or entries through emergency exit doors. It can also serve as an inexpensive security device and help prevent theft.

INSTALLATION

Highly versatile, can be mounted or installed on to any type of door, including remote placement of sounder.

ELECTRONICS

There are a number of user programmable features to suit application needs. The alarm is powered by a 9V PP3 battery. 12-24 or wireless option is available.

CONSTRUCTION

Virtually indestructible UV-stabilised polycarbonate housing.

1. Exit Stopper®

Highly effective door alarm alerts to unauthorised use of exit doors.
STI-6400 - For single door installation
STI-6402 - For double door installation
STI-6400-G - For single door installation in Green

2. Wireless Exit Stopper® with Receiver

Wireless supervision for exit doors. Includes an STI 8-Channel Receiver.
STI-6400WIR8

3. Wireless Exit Stopper® with Voice Receiver

Wireless supervision for exit doors. Includes an STI 4-Channel Voice Receiver.
STI-V6400WIR4

4. Wireless Exit Stopper®

Wireless alarm unit to monitor the use of emergency exit doors. Requires an STI Receiver to alert to misuse.
STI-6400WIR

The Extinguisher Stopper has proven highly effective in helping prevent theft, misuse and vandalism of fire extinguishers. The Extinguisher Stopper will leave the extinguisher accessible for emergencies and will not interfere in the event of a real fire.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 13 for dimensions.

FIRE & SAFETY

Extinguisher Alarms

1. Extinguisher Stopper®

Alarm unit to help prevent theft, vandalism or misuse of fire extinguishers.
STI-6200

2. Wireless Extinguisher Stopper® with Receiver

Wireless supervision for fire extinguishers. Includes an STI 8-Channel Receiver.
STI-6200WIR8

3. Wireless Extinguisher Stopper® with Voice Receiver

Wirelessly monitor the use of fire extinguishers. Includes an STI 4-Channel Voice Receiver.
STI-V6200WIR4

4. Wireless Extinguisher Stopper®

Wireless alarm unit to monitor the use of fire extinguishers. Requires an STI Receiver to alert to misuse.
STI-6200WIR

5. Mini Theft Stopper®

Protects freestanding or cabinet mounted fire extinguishers and other equipment.
STI-6255 - Single Protection
STI-6255-M2 - Double Protection

These heavy-duty steel cages are designed to protect smoke and fire detectors from vandalism and misuse, whilst remaining fully accessible and operational.

Cages are backed by a three year guarantee against breakage in normal use.

COVERS & CAGES

Smoke & Heat Detector Cages

DESIGN

These steel cages are designed to protect smoke and heat detectors from vandalism and misuse. Designed so there is no interference with the operation of the protected unit.

INSTALLATION

Quick and easy installation, can retrofit protecting within minutes.

OPTIONS

Stainless steel versions are available for flush or surface mount applications. Where additional security is required from theft or misuse, tamper resistant screws and matching bits are available.

CONSTRUCTION

Constructed from plastic coated, heavy-duty galvanised steel rod, the cages can withstand the severest of abuse from vandalism or accidental damage.

Designed to protect smoke and heat detectors from vandalism and misuse. Constructed from plastic coated, heavy-duty galvanised steel rod, the cages can withstand the severest of abuse from vandalism or accidental damage.

This range of multipurpose, transparent polycarbonate enclosures and metal cabinets are designed for the protection of fire and security control panels and other electronic equipment. Combining a tough, rugged construction with stylish design, the series offers excellent protection for a wide range of equipment.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 39 for dimensions.

COVERS & CAGES

Environmental Covers & Enclosures (Waterproof/Weatherproof)

DESIGN

Robust enclosures protect control panels located in areas where the environmental conditions are extreme and/or the threat of vandalism or misuse is high.

INSTALLATION

External mounting tabs allow the enclosure to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. Mounting accessories and tamper-proof screws are provided.

ELECTRONICS

Available with or without a 95 dB alarm, powered by a 9V PP3 battery, to deter unauthorised access to devices.

CONSTRUCTION

Tough UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage to control panels and other electronic equipment.

2

4

3

5

6

Multipurpose UV-stabilised polycarbonate and heavy-duty metal cabinets and enclosures designed to protect fire and security control panels and electrical equipment from damage, vandalism and the environment. Enclosures can mount on the wall enabling units to be protected in their designated locations.

These multipurpose, transparent polycarbonate cabinets and enclosures are designed to protect fire and security control panels, electrical units, AED cabinets and various other larger devices. They offer excellent protection from vandalism, accidental damage and the environment whilst ensuring all-round visibility and access.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 39 for dimensions.

COVERS & CAGES

Environmental Covers & Enclosures with Alarms

DESIGN

Robust protective enclosures protect AED's and other equipment located in public areas where there is a history of misuse of equipment.

INSTALLATION

External mounting tabs allow the enclosures to be easily installed on to any wall surface, providing protection without the need to change the location of the equipment. Mounting accessories and tamper-proof screws are provided.

ELECTRONICS

For additional security and to deter misuse and theft, the enclosures can be fitted with a security alarm or sounder/strobe device. Security alarm available with 100 dB flashing beacon.

CONSTRUCTION

Tough UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage to the AED and other electronic equipment.

These multipurpose polycarbonate and metal enclosures are available with heater and/or air conditioner facility, and are designed to protect larger sized sensitive equipment, like alarm control panels, from extreme temperatures, vandalism or accidental damage, whilst retaining the desired operating temperatures.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 39 for dimensions.

COVERS & CAGES

Environmental Covers & Enclosures with Heater & Aircon

DESIGN

The Air Conditioner unit is externally mounted to minimise space intrusion in the cabinet.

INSTALLATION

Metal enclosures mount to the wall enabling the unit to be protected in its designated location. Control panel mounting backplate is included.

ELECTRONICS

Heater unit has a low ambient operation package to help prevent it from freezing, and the aircon unit fan runs continuously to sustain a uniform temperature inside the enclosure.

CONSTRUCTION

Heavy-duty metal cabinets have a durable finish to help protect against corrosion. The heavy-duty metal protects against vandalism, either accidental or intentional as well as dirt, dust and grime.

1

2

4 & 5

3

6

These polycarbonate and metal enclosures with built-in heater and air conditioner facility (models also available with air conditioner only) are designed to house larger sized sensitive equipment against vandalism, damage, dirt and grime. By maintaining a temperature above freezing, devices are able to be installed outdoors or in below freezing environments and still remain operable.

These tough covers have been designed to protect card readers, access control keypads and similar devices from abuse and accidental damage as well as from the external elements. All covers are moulded from tough polycarbonate material that is UV-stabilised against discolouration.

Three year guarantee against breakage of polycarbonate in normal use.

COVERS & CAGES

Biometric & Keypad Covers

DESIGN

Covers designed to protect access and keypad control panels from vandalism and accidental damage as well as the elements.

INSTALLATION

Quick and easy to install. Covers can be retrofitted over an existing device allowing it to maintain its current location.

OPTIONS

Certain models are available in a smoke finish for further security. Gasket replacement is recommended at least every five years.

CONSTRUCTION

Covers are moulded from tough, UV-stabilised polycarbonate. Models fitted with stainless steel torsion spring allows the cover to maintain in a closed position.

2

3

4

5

6

These tough covers have been designed to protect card readers, access control keypads and similar devices from abuse and accidental damage as well as the elements. All covers are moulded from tough polycarbonate material that is UV-stabilised against discolouration.

The Thermostat Protectors are recommended for areas where abuse or tampering of thermostats is a problem. Holes in the frame allow air to circulate freely for proper operation of the thermostat but an interior wall prevents any tampering to the controls with a small object.

Three year guarantee against breakage of polycarbonate in normal use.

COVERS & CAGES

Thermostat Protectors

DESIGN

These tough, locking covers help prevent vandalism, damage and tampering of thermostats or energy sensors. Tamper resistance double wall design allows airflow to the protected device.

INSTALLATION

Quick and easy to install. Covers can be retrofitted over an existing device allowing it to maintain its current location.

1

OPTIONS

Certain models are available in a smoke finish. Models are available with locks, ideal where thermostats are located in public areas.

CONSTRUCTION

Covers are moulded from tough, UV-stabilised polycarbonate.

2

3

4

5

Tough, clear covers designed to protect thermostats. Recommended for use in areas where abuse or tampering is a problem. These units have the option of a key lock facility to prevent unauthorised tampering; especially useful when the units are located in public areas.

COVERS & CAGES

Euro Stopper®

The Euro Stopper is a protective cover which helps prevent malicious or accidental activation of call points and emergency switches. The Euro Stopper consists of a clear, tamper-proof, tough UV-stabilised polycarbonate cover and frame that retrofits over the manual call point. Ideal for schools, hospitals and all public buildings where there is a history or threat of false activation.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

Refer to Page 13 for dimensions.

DESIGN

Protective cover with optional integral sounder. Prevents false alarms without hindering legitimate operation of the call point or emergency switch. Glow in the dark frame provides further security.

INSTALLATION

Quick and easy to install and protecting in minutes. A simple 4 fixing installation can retrofit over existing device. Can accommodate flush or surface mount applications.

ELECTRONICS

Available with or without a 96 dB integral sounder, powered by a 3V lithium battery. The sounder draws immediate attention to the area.

CONSTRUCTION

Tough UV-stabilised polycarbonate housing can withstand the severest of knocks preventing any vandalism or accidental damage to the manual call point.

CALL POINTS & SWITCHES

ReSet Call Points

The ReSet Call Point mimics the feel of breaking glass whilst offering the benefits and environmental advantages of a resettable operating element. Suitable for areas that are at high risk of false activations or sensitive to broken glass.

DESIGN

An indicator drops into view at the top of the window on activation. The unit is then simply reset with a key and is ready for use.

ELECTRONICS

There are 4 electrical arrangements available; Single Pole Changeover, Double Pole Changeover, Conventional Fire model (470 680Ω) and Sav-Wire 2 Wire Systems.

INSTALLATION

Easy installation due to no glass elements that could be broken or incorrectly fitted. Integral cover available.

CONSTRUCTION

Extremely attractive, high value look and feel: glass appearance maintains operator deterrence, whilst a visible warning flag confirms activation and key allows units to be quickly reset.

One year on electro-mechanical and electronic components.

Flush Mount
87mm x 87mm x 23mm

CALL POINTS & SWITCHES

Waterproof ReSet Call Points

The Waterproof ReSet Call Point mimics the feel of breaking glass whilst offering the benefits and environmental advantages of a resettable operating element. The waterproof models are suitable for indoor/outdoor or wash-down areas that are sensitive to broken glass or harsh environments.

DESIGN

An indicator drops into view at the top of the window on activation. The unit is then simply reset with a key and is ready for re-use. Waterproof models are tested to IP67.

ELECTRONICS

There are 3 electrical arrangements available; Single Pole Changeover, Double Pole Changeover, and Conventional Fire model (470 680Ω).

INSTALLATION

Easy installation due to no glass elements that could be broken or incorrectly fitted. Waterproof models only available for surface mounted applications.

CONSTRUCTION

Extremely attractive, high value look and feel: glass appearance maintains operator deterrence, whilst a visible warning flag confirms activation and key allows units to be quickly reset.

One year on electro-mechanical and electronic components.

90mm x 89mm x 72mm

Key Switches

DESIGN

Recessed key barrel prevents risk of damage to the Key Switch. 'Standard Function Marking' label sheets provided if Custom Label is not specified.

CONSTRUCTION

Moulded in tough UV-stabilised polycarbonate. Space available for function marking or operating instructions.

INSTALLATION

Quick and easy installation. All models are supplied as Dual Mount (35mm black back box) to allow the user the choice of flush or surface installation.

ELECTRONICS

Contact rating (switching resistive load) 5A 115 V AC, 3A 50 V DC

Standard Models

*All supplied with Standard Function Marking Labels

Access Control Key Switches

SS3-3041

Green Housing, 2 Position Key Switch, Double Pole - Normally Open

SS3-3042

Green Housing, 2 Position Key Switch, Double Pole - Normally Closed

General Application Key Switches

Yellow Housing, 2 Position Key Switch, Single Pole Changeover

BUILD IT YOUR WAY

Build Your Key Switch

Select from each step your preferred option to generate your desired product code. All models will be supplied with Standard Function Marking unless -CL is specified.

SS3-

Step 1
Colour Options

10 = Red - Dual Mount
30 = Green - Dual Mount
50 = Yellow - Dual Mount
70 = White - Dual Mount
90 = Blue - Dual Mount
E0 = Orange - Dual Mount

Step 2
Switch Type Options

2 = 2 Position Key Switch Single Pole
3 = 2 Position Key Switch - Key Trapped in 'on' position
4 = 2 Position Key Switch Double Pole
5 = 3 Position Key Switch

Step 3
Electrical Options

0 = Single Pole Changeover
1 = Double Pole Normally Open
2 = Double Pole Normally Closed
3 = 3 Position Key Switch Arrangement

Step 4
Label Options

CL = Custom Label*

PLEASE NOTE: Electrical Arrangement Conditionals. Options are:

- Single Pole Changeover = 2 Position Key Switch & Key Trapped in 'on' position
- Double Pole Normally Open = 2 Position Key Switch & Key Trapped in 'on' position
- Double Pole Normally Closed = 2 Position Key Switch & Key Trapped in 'on' position
- 3 Position Key Switch Arrangement = 3 Position Key Switch only

Standard Function Marking: Contains the following labels, with • EMERGENCY • EMERGENCY POWER OFF • EMERGENCY STOP • EVACUATE • EXIT • GAS SHUT OFF
black or white text, depending on colour selected: • ISOLATE • PANIC ALARM • POOL ALARM • PRESS TO EXIT • SHUT DOWN • SMOKE VENT

E.G. SS3-1020 for Red, 2 Position Key Switch with Standard Function Marking labels

*For custom label option, must provide wording (max. 1 line, 20 characters, including spaces).

The Alert Point is an aesthetically pleasing, robust and fully featured stand-alone alarm system. It is available in a variety of colours and can be used for a wide variety of application such as Fire, Intruder and Panic. It provides an effective means of raising an alarm in the event of an emergency.

Three year guarantee against breakage of polycarbonate in normal use (one year on electro-mechanical and electronic components).

170mm x 125mm x 58mm

CALL POINTS & SWITCHES

Alert Point

DESIGN

Stand-alone alarm system is fitted with an integral resettable call point, simple key-to-reset with no broken glass or parts to replace. Aesthetic design, available in a choice of colours to suit a variety of applications.

INSTALLATION

Stand alone, self-contained alarm system. No wiring involved and a simple 4 screw fixing making installation quick and easy.

ELECTRONICS

Once activated a 102 dB alarm (at 1 metre) will alert, an activation flag drops in to view and the built in LED facility flashes red. Any external connected devices will be activated.

CONSTRUCTION

It is manufactured from tough polycarbonate, and designed for use in industrial, commercial and retail applications as well as portacabins, construction sites, car parks, churches and holiday parks.

BUILD IT YOUR WAY

Build Your Alert Point

Select from each step your preferred option to generate your desired product code.

AP-

Step 1 Series Options

- 1 = Alert Point
- 2 = Alert Point: *Lite*
- 3 = Alert Point with Beacon
- 4 = Alert Point: *Lite* with Beacon

Step 2 Colour Options

- R = Red
- B = Blue
- G = Green
- W = White

Step 3 Label Options

- A = House Flame Logo
- B = Fire
- C = Intruder
- D = Panic
- E = Evacuation
- F = Assist
- G = General Alarm
- H = Alert
- I = Emergency Exit
- R = Running Man Logo
- X = Custom Label*

*For custom label option, must provide wording (max. 2 lines, 10 characters per line, including spaces).

Call Points & Switches

Inoperable Break Glass Call Point inconvenience?

No more broken glass, Just ReSet!

- The resettable operating element within the ReSet Call Points, allows the unit to be reset without any additional cost implications.
- No broken glass means the ReSet Call Points are ideal for areas that are sensitive to broken glass such as kitchens and public areas.
- Easy installation due to no glass elements that could be broken or incorrectly fitted.
- Glass appearance maintains operator deterrence, whilst a visible warning flag confirms activation.
- For further protection, Protective Covers are available to further enhance the security of your Call Point.

The Wireless Alert Series wirelessly monitors numerous STI devices from one single convenient location. When the receivers detect a tripped site, an audible, visual or voice programmable message will alert which transmitter has been activated.

Three year guarantee against breakage of polycarbonate in normal use (one year on electromechanical and electronic components).

Refer to Page 57 for dimensions.

WIRELESS PRODUCTS

Residential & Commercial Wireless Alert Series

DESIGN

Specially designed to protect and monitor all areas of a building. The receivers have a compact design making them easy to either mount on a wall or place on a desk.

INSTALLATION

No difficult wiring involved. 4-Channel Voice Receiver has easy programming voice prompt and recognises the transmitter. Sensors mount easily in desired location.

ELECTRONICS

When motion or use is detected, the sensor sends a wireless signal to an indoor STI receiver. It has a supervised battery and signal reception.

CONSTRUCTION

Latching and auto-restore mode of operation. 433 MHz wireless frequency.

1. Wireless Doorbell Button Alert
Supplied with 4-Channel Voice Receiver, alerts when doorbell button is pressed.
STI-V34600 (includes STI-34601)

2. Wireless Door Chime
Supplied with 4-Channel Voice Receiver, alerts when site is tripped.
STI-V34450 (includes STI-34401)

3. Universal Alert Sensor
Alerts when monitored site is tripped.
STI-34401

4. Wireless Garage Sentry Alert
Supplied with 4-Channel Voice Receiver, alerts when garage door is opened.
STI-V34300 (includes STI-34301)

5. Wireless Extinguisher Stopper®
Wirelessly monitor and prevent misuse of fire extinguishers.
STI-6200WIR
STI-V6200WIR4 - with 4-Channel Voice Receiver
STI-6200WIR8 - with 8-Channel Receiver

6. Wireless Exit Stopper®
Wirelessly monitor the use of emergency exit doors.
STI-6400WIR
STI-V6400WIR4 - with 4-Channel Voice Receiver
STI-6400WIR8 - with 8-Channel Receiver

7. 8-Channel Receiver
Receiver can monitor up to 8 wireless STI devices from one convenient location.
STI-34108

Wireless Alert Series

Monitor your building from one convenient location

- Wirelessly monitor key areas of your building with the Wireless Alert Series.
- The Wireless Exit Stopper® will alert you to any authorised or unauthorised use of emergency exit doors.
- Emits a piercing 95/105 dB alarm when a protected door is opened and sends a wireless signal to an STI receiver.
- Sensors have supervised battery and signal reception.
